

## CAD DESIGNER

Seeking CAD Designer proficient in Rhino and Matrix software, with 3-5 years of experience in Jewellery design.

### Responsibilities:

- Create detailed jewellery designs using CAD software.
- Translate concepts into technical drawings.
- Collaborate with team to refine designs.
- Ensure designs meet aesthetic and technical standards.
- Design and create 3D CAD models of jewelry pieces using software like Rhino, 3Design, or Matrix.
- Collaborate with designers, engineers, and production teams to ensure design feasibility and quality.
- Modify and refine designs based on feedback and production requirements.
- Create prototypes and samples for testing and approval.
- Stay up-to-date with industry trends, software updates, and new technologies.
- Conduct quality checks on designs and prototypes to ensure they meet company standards.
- Prepare technical drawings and specifications for each design, including measurements, materials, and production notes.
- Creative and artistic skills with the ability to visualize and conceptualize designs.
- Strong problem-solving abilities and technical aptitude.
- Good communication and teamwork skills.
- Optimize designs for manufacturing and production processes

### Skills and Qualifications:

- Proficiency in Rhino and Matrix.
- Strong understanding of jewellery design and manufacturing.
